Natural + Artificial Gras

Natural + Artificial Gras

#01 SUPERGRIP

High-Grip Performance. SuperGrip. A new type of adhesive foam technology with high-grip-elements. Benefit: ultra-strong grip and optimal durability in the adhesive foam.

#02 ABSOLUTGRIP

Our patented foam is at its best in dry weather but will not let you down when things get wet.

#03 SOFT

Our soft foams which all have the same thing: The balance between grip and abrasion resistance. The voluminous and softer, the better the grip and greater the abrasion. The more compact, the longer it will last. Only you know your personal balance. Try them. Decide between: SUPERSOFT+, SOFT or STARTERSOFT.

Natural + Artificial Gras + Hard Ground

Natural + Artificial Gras + Hard Ground

#04 AQUASOFT

Aquasoft foam patented by uhlsport. Thanks to special aqua additive, particularly good grip properties under wet weather conditions. All Aquasoft gloves from uhlsport are designed in a unique, bright colour: Aquasoft-Blue!

#05 RESIST

A new latex generation with RES particles for artificial grass and hard floors. Optimized foam qualities make it particularly abrasion proof. Surface of the palm with abrasion proof graphite particles. Quality level: + 3 mm SuperResist (soft/smooth surface) / + 3 mm SoftResist (soft/smooth surface) / + StarterResist (lightly-textured surface)

CUT-177 TECHNOLOGY

REFLEX CUT

Innovative inner seam construction ensures a tight fit and maximum ball control.

FINGERSURROUND CUT

Combination of inner seam and ergonomic external design provides a tight fit and maximum grip.

HALF NEGATIVE CUT

Inner seam construction ensures a tight fit and maximum ball control.

ROLLFINGER CUT

Ergonomic exterior seam design provides for seamless complete grip.
Benefit: 100% grip.

CLASSIC CUT

Exterior seam design maximizes the inner hand surface. Sure handedness increases with the contact surface on the ball.

FRAME- TECHNOLOGY

BIONIKFRAME

BIONIKFRAME

THE LIGHT, FLEXIBLE SUPPORT.

The Bionikframe. Inspired by nature – the greatest system ever – the Bionikframe is based on a design, which precisely imitates and supports the function of our natural ligaments. The result: Stable. Flexible. Light. For all those who claim pretection is nothing for them.

BIONIKFRAME
PLUS

BIONIKFRAME+

BIONIKFRAME+ WITH THUMBFRAME.

The thumbs plays a truly important role in your hand. It is the strongest finger. Gripping and throwing are its best disciplines. Its carpometacarpal joint gives a great amount of freedom to this gripping finger. Of course it also needs to be preprotected. However stabilization while maintaining freedom of movement is not very simple. Nonetheless. We have done it and can reliably preprotect your thumb. BIONIKFRAME+ with THUMBFRAME.

SUPPORTFRAME

SUPPORTFRAME

THE CLASSIC.

The SUPPORTFRAME provides optimal stabilization even in the basic and children's models. The hinge-like finger structure offers the best protection while ergonomically supporting the hand.

SUPPORTFRAME
PLUS

SUPPORTFRAME+

SUPPORTFRAME+ THE CLASSIC. TECHNOLOGY.

The patented finger and thumb stabilization system supports the catch movement. The hand is relieved by the anatomical preforming and lightweight construction. Due to the integrated backhand plate an optimal shock absorption and force distribution is possible.

REFLEX CUT

Innovative cut guarantees a high level of comfort, touch and ball control.

3D SCHOCKZONE

Optimized punching effect with integrated high rebound foam.

360° GRIP

New developed surround grip for maximized catching area and optimized grip at all ball contact zones.

EASY ENTRY SYSTEM

Special elastic material provides an easy entry into the glove.

SUPERGRIP

Innovative foam provides a higher grip level with integrated high-grip elements.

STIMULATE

Integrated, anatomically adapted silicone elements „STIMULATE“ for increased performance.
